## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of Invention I, (now claims 1-16) is hereby acknowledged. Applicant states that amended (05/17/2006) claim 17 is also directed to temperature measurement. This argument is not persuasive because, even both Inventions are now directed to temperature measurements they are distinct for the reasons shown in paragraph 2 of the instant Office Action. Therefore, claims 17-18 (Invention II) are withdrawn by the Examiner from further consideration as drawn to non-elected invention.

The restriction requirements stated in the previous Office Action is hereby repeated and thus made **FINAL**.

### **Election/Restrictions**

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-16, drawn to method for determining an interior temperature, classified in class 374, subclass 109.
  - II. Claims 17-18, drawn to method for determining temperature, classified in class 374, subclass 129.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to different methods: Invention I is

directed to method for determining an interior temperature, and does not require providing a pulsed heat signal to a heat element, as required by the method of Invention II. Invention II requires steps of determining damping amount, not required by Invention I. Invention I requires a particular housing not required by Invention II. Invention I is directed to determination of "an interior temperature is based on a value for incident sun radiation" not required by Invention II.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 1 is finally rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: perhaps applicant should introduce a step of how the corrected value and the recorded incident sun radiation (lines 5-6) are used in determining the interior temperature, since the preamble states that the determination of "an interior temperature is based on a value for incident sun radiation"? How the data from step in lines 5-7 further limits the claim?

***Allowable Subject Matter***

6. Claims 1-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.
